IQS Launches Pistol Permit Management Software

LIVERPOOL, NEW YORK – August 12, 2010 – Info Quick Solutions (IQS) is proud to introduce electronic pistol permit management as a new service. With Pistol Permit Software by IQS, filing the necessary paperwork for a permit, making amendments, and creating pistol licenses are no longer time-consuming manual processes. IQS makes the process of issuing and managing pistol permits digital and more efficient.

Benefits:

- Save time by electronic entry
- Print permit cards on any media, including plastic
- Applicant's picture, thumbprint, and signature are all captured and stored electronically
- Look up any document in a file on the computer, eliminating the need to go and pull a file from the file room
- Easily retrieve information about permit holders and pistols
- Quickly trace ownership history of a pistol
- Avoid errors with the ability to transfer gun and permit holder information when making amendments
- Immediately print necessary paperwork and permit cards, properly filled in by the software
- Print replacement cards at the click of a button using information stored in the system

The Pistol Permit Management software is available standalone or as a fully integrated component to the IQS Solution Records Management Suite. More information is available at <http://iqsworks.com/solutions/pistols>.

About IQS

Info Quick Solutions (IQS) is a provider of innovative records management solutions for a wide variety of municipal customers. IQS assists county recording offices by streamlining document recording processes through the provision of state-of-the-art indexing and imaging software, disaster recovery services, and backfile conversion solutions.
